## ***HEALTHY LIVER SNACKS FOR YOUR PETS***

Pets love the flavor of Mack Brook Farm Liver. They seem to instinctively know it's as good for them as our beef is for you. Dogs can eat meat raw or cooked. Cats need to eat it cooked. Dogs enjoy any cut of beef (give them the soup bone after you've made Mack Brook Farm Stock and see how happy they are!). Both dogs and cats love the liver – or any organ meat. If you have a dehydrator, the recipe below makes terrific treats!

Another tasty treat - our Marrow Bones! Dogs go crazy for them!

1 pound Mack Brook Farm Liver (it is already sliced)

Bake liver slices on greased pans at 350 degrees for 20 minutes.

Cut liver into bite-size cubes. Spray dehydrator trays with oil. Leave in dehydrator for 8-10 hours.
